La nuova edizione del libro “Tecnologie di lavorazione delle olive in frantoio”, pubblicata da Edagricole-New Business Media, fa seguito e amplia quella del 2010, pubblicata da Tecniche Nuove. Nel libro vengono descritte tutte le operazioni tecnologiche che si effettuano nell’oleificio, dallo stoccaggio delle olive alla estrazione dell’olio, dall’imbottigliamento alla utilizzazione dei sottoproducti, e le apparecchiature che consentono di realizzarle. In particolare è stata seguita l’evoluzione che, dagli anni ’50 del secolo scorso, hanno subito gli impianti e le macchine operanti nei frantoi oleari dotati dei vari sistemi di estrazione meccanica dell’olio, da quelli discontinui della pressione e del percolamento a quelli di più recente impiego che adottano la centrifugazione continua della pasta di olive, a due e a tre fasi. Le trasformazioni dell’oleificio, verificatesi nel corso del tempo e favorite dal progresso tecnologico e dalle indicazioni della ricerca, e il loro impatto sul prodotto olio, trovano testimonianza nelle numerose tabelle e nei grafici che riportano i risultati ottenuti dai ricercatori nello studio delle specifiche tematiche.

Il libro, di circa 460 pagine, è composto da 13 capitoli, il primo dei quali è dedicato alla storia dell’olivo e dell’olio, mentre il secondo è dedicato alla produzione mondiale di olive e di olio d’oliva, in particolare a quella dei paesi del bacino del Mediterraneo, con considerazioni riguardanti la qualità merceologica del prodotto e la sua composizione chimica, sia quella trigliceridica sia quella dei componenti minori. I successivi nove capitoli sono dedicati alle operazioni tecnologiche effettuate in oleificio, mentre gli ultimi due capitoli trattano, rispettivamente, il problema della conservazione dell’olio, in attesa del suo confezionamento, e l’utilizzazione dei sottoproducti, sanse e acqua di vegetazione, da impiegare razionalmente e in modo eco-sostenibile, quale esempio, in agricoltura, di quell’economia circolare di cui il mondo ha attualmente bisogno.

Il testo, completato da oltre 200 figure, tra foto e grafici, da oltre 160 tabelle e da oltre 500 riferimenti bibliografici, rappresenta un lavoro utile per gli operatori del settore olicolo-olerario, per gli studenti di Agraria delle Scuole Superiori, per gli studenti delle Facoltà di Agraria e dei Corsi di Laurea in Tecnologie Alimentari delle Università, per i ricercatori che possono trovare nell’ampia e specifica bibliografia una base di riferimento per la loro attività e, infine, per tutti coloro che, direttamente o indirettamente o per cultura personale, sono interessati all’olio vergine di oliva e avvengono la necessità di essere informati su un tema e su un prodotto che rappresenta un elemento essenziale della loro alimentazione.

**Titolo:** Oil and Oilseed Processing  
**Autori:** Tomás Lafarga, Gloria Bobo, Ingrid Aguiló-Aguayo  
**Editore:** Blackwell Pub;  
**Edizione:** 1ed. (6 maggio 2021)  
**Lingua:** Inglese  
**Pagine:** 350  
**ISBN-10:** 1119575273  
**ISBN-13:** 978-1119575276  
€ 181,04  
€ 123,60 (format Kindle)

Oil and Oilseed Processing offers a comprehensive text that explores both the conventional and novel “green” extraction methods used to extract oils from seeds. The authors - noted experts on the topic - examine the positive aspects of operations in processing oil and oilseeds and present the pro-
cessing concepts, principles, effects on quality, as well as the stability characteristics, limitations, and challenges. Due to the economic implications associated with the overproduction of seed oils, the book includes pertinent information on vegetable and animal-derived oils for industrial applications. The authors also explore recent applications and future perspectives for vegetable and animal oils use in the food and non-food industry. Safety concerns regarding oil and oilseed processing and waste valorisation are also covered in-depth. This important guide:

• Explores the traditional and new extraction methods used to extract oils from seeds
• Contains the most up-to-date insight into oil and oilseed processing
• Focuses on the areas of oil processing, safety, quality, and nutritional evaluation

Written for food scientists and professional food technologists, *Oil and Oilseed Processing* is the only book on the market that contains the most recent information on all aspects of oil and oilseed processing.

**CONGRESSI**

**AOCS - Plant Protein Science and Technology Forum - On line**
**October 12-14, 2021 | Chicago, Illinois, USA**

*Why Attend?*
This one-of-a-kind conference brings together leaders from all components of the food system - from production and processing to distribution and consumption. As an attendee, you will be able to:

• Connect with colleagues from around the globe to explore the future of plant-based food systems.
• Learn the latest information on the analysis, nutrition and applications of plant proteins.
• Participate in live, interactive sessions either in person or online. The meeting is designed to provide a flexible experience to meet all attendees’ needs.

Make sure your voice is heard as we shape the future of the plant protein environment together.

**Explore Technical Sessions**
Immerse yourself in the latest research and innovations through our program of technical sessions. Click on the following session topics to learn more about them:

• Nutritional Functionality and Quality of Plant Based Proteins: Linking Form to Function
• New Frontiers on Extraction and Separation Technologies for Plant Proteins
• Overview of Structure-Function Relationships of Plant Proteins
• Global Challenges in Food Security and the Technological Innovations Needed to Overcome Them

**Euro Fed Lipid Congress and Expo - On line**
**October 18-21, 2021**

In the last year, COVID-19 has shaken the world and the congress Industry to the core. Where everything in life goes virtual, we will also go virtual with the 18th Euro Fed Lipid Congress and Expo to take place 18-21 October 2021 (On-line Meeting). We hope this will help you to keep up to date with the latest scientific developments in your field, to network with your peers and exhibitors and to share your research via oral and poster presentations.

*Topics:*

• Analytics
• Bioeconomy and Green Deal
• Bioscience and Biotechnology
• Contaminants
• Dairy and Animal Lipids
• Deep Frying
• Health and Nutrition
• Insect Lipids
• Lipidomics
• Lipid Oxidation
• Marine and Algae Lipids
• Oleochemicals
• Olive Oil and Authenticity
• Plant Lipids and Vegetable Oils
• Physical Chemistry
• Processing & Sustainability
• Other Topics

To give you a glimpse of what the 18th Euro Fed Lipid Congress and Expo (online) has to offer, please follow this link:

Scientific committee and The Euro Fed Lipid Congress Team
https://veranstaltungen.gdch.de/tms/frontend/index.cfm?l=10713&sp_id=2

**Biofuels International Conference & Expo**
**19 - 20 October 2021 | Brussels, Belgium**

The 13th Biofuels International Conference & Expo will bring together leading producers, suppliers, regulators and other engaged organisations over a two-day period. High-level speakers, experts in their field, will address a range of topical issues relating to the biofuels sector. Brought to you by Biofuels International, the leading international biofuels magazine, this year’s conference will be held in
Brussels, Belgium and colocated with the International Biogas Congress & Expo as well as the renowned Biomass Congress & Expo, making this series of bio events our largest gathering yet of bio related companies, giving participants unrivalled coverage.

To join us as a sponsor, exhibitor or potential speaker please contact:

claire@woodcotemedia.com
+44 203 551 5751

7th International Conference on Food Chemistry & Technology (FCT-2021)
November 08-10, 2021 | Paris, France
We’re glad to welcome you to the 7th International Conference on Food Chemistry & Technology going to be held at Hotel Mercure Paris CDG Airport & Convention, Paris, France on November 08-10, 2021 organized by United Scientific Group (Non-profit organization).
FCT-2021 provides a unique opportunity to network with your peers and consists of highly proficient series of talks, poster presentations, workshops, discussions and networking events will keep our fellow participants engaged in learning and making new connections.
This 3-day conference features the world-class renowned food scientists and will bring together experts, young researchers, education scientists, technologists and food industry representatives to debate on the latest scientific developments in the field of food chemistry and technology that helps to improve the current and future challenges in food research.
FCT-2021 is a part of successful series of the conference started from FCT-2015, San Francisco, and held annually since then. This is going to be a global event with participants from more than 39 countries and ample opportunities for networking and learning from Senior Investigators, Scientists, and Experts from elite organizations & institutes that work on food chemistry.

Make sure to block 08-10 November 2021 on your calendar, to join world-renowned researchers, scientists, policy makers, professionals and students from multidisciplinary food-related fields to share the ongoing research and create new partnerships & collaborations.
We hope that you will enjoy the scientific as well as social program at the conference and the beauty of the city of light, “Paris”.
We look forward to see you in Paris.
Scientific sessions
Session I – Food Chemistry
Session II – Food Microbiology, Safety and Preservation
Session III – Symposium and Food Hydrocolloids
Session IV – Food Technology

5th International Symposium 'Dietary Fat and Health'
9-10 November 2021 | Frankfurt/Main, Germany
We kindly invite you to the 5th International Symposium on “Dietary fat and health” at Frankfurt. In the last years a lot of new data was generated regarding the health effects of alpha-linolenic acid, linoleic acid, marine omega-3 fatty acids and palmitic acid changing in some respects our previous knowledge. This Symposium is dedicated to summarize, interpret and discuss the clinical importance of these new findings and how to mediate them into the community.
Each presentation is scheduled for 40 minutes followed by 20 minutes of intensive discussion. In the best case each presentation and discussion should lead to new ideas about future projects and necessities.
We look forward to welcoming you at Frankfurt whether you are a scientist, a clinician, a dietician or a student.
Contact: DGF Congress team

Advanced Oils & Fats Processing and Application Technology - On line
November 16, 17 & 18, 2021
Smart Short Courses goes On line again. We already had successful online programs last Novem-
ber 2020 and in April 2021; now we bring the technical short course back in a fully updated version. This 3-day short course will bring together industry experts from around the world offering practical information on oilseed and oil processing and quality issues and how to integrate these in downstream products. The program is directed at plant engineers, chemists, technicians, managers, and superintendents.

This is a unique opportunity for new plant personnel and for those who are experienced to meet experts in the field to discuss current problems and learn how to enhance their operations.

The course material will also serve as a useful reference for processors, product formulators, chemists and technicians as well as business managers familiar with oils & fats processing, and the production of finished products.

Target Group Decision makers such as technicians, equipment manufacturers, product formulators, plant engineers, processors, chemists and sales and marketing specialists.

6th International Industrial Coating Technologies Exhibition
November 25-27, 2021 | Istanbul Expo Center
Eurasia’s Leading Industrial Coating Technologies Exhibition “International Industrial Coating Technologies Exhibition” Paintexpo Eurasia will take place collocate with Surface Treatment Exhibition Surftech Eurasia 25-27 November 2021, at Istanbul Expo Center, Turkey.

Industrial coating technologies are mainly used in automotive and sub-industries, railways, shipbuilding and shipyards, aviation industry, machinery manufacturing industries, metal and sheet processing industry, plastic processing industry, white goods, furniture, sports and entertainment, metal and glass facade constructions, window and door manufacturing, electronic industry, heating and cooling equipment manufacturing and packaging industries.

Similar to the Industrial Coating Technologies Exhibition Paintexpo which is organized biennially in Germany by FairFair, Paintexpo Eurasia is being organized by Artkim in Istanbul, Turkey for the 6th time and is gathering industry professionals from all around the World. The rapid improvement in the industry and the production volume in Turkey, especially in the wet-painting and powder-coating, application systems and spray guns, wet and dry paints, automation and feeding technologies, cleaning and pretreatment, drying and hardening, environmental technology, compressed air systems, air supply and exhaust air purification, water treatment, recycling and disposal, accessories, measuring and testing technologies, quality assurance, paint stripping, contract coating services has provided momentum as the same growth and development in the coating industry.

Why exhibit
Get a chance to meet industry professionals who are directly in your target market. Step ahead of your competitors by displaying your products and solutions. Create sales opportunities to promote your business and reach potential customers by the support of the extended promotional campaigns that are conducted before, during and after the show. Receive new orders. Increase your market share in Turkey which is one of the Europe’s largest market. Strengthen your market presence and brand awareness.

Exhibitor Profile
• Systems and Equipment for Wet Painting, Powder Coating and Coil Coating
• Application Systems and Spray Guns
• Wet Paints and Powder Coatings
• Automation and Conveyor Technologies
• Cleaning and Pre-Treatment
• Drying and Curing
• Environmental Technology, Air Supply and Exhaust Air Purification, Water Treatment, Recycling and Disposal
• Accessories (Covering Materials and Systems, Painting Hangers, Filters, Pumps)
• Measuring and Test Technology, Quality Assurance
• Paint Stripping
• Job-Shop Coating
• Services
• Training and Vocational Education
• Research Visitor Profile
• Coating Job-Shops
• Automotive Industry and Suppliers
• Commercial Vehicles, Railway, Ship and Shipyards
• Aviation and Aerospace
• Machinery Manufacturing
• Metal and Metal Sheet Processing
• Plastics Processing
• White Goods and Household Appliances
• Furniture (Wood and Metal)
• Sports and Leisure Products
• Metal and Glass Facade Construction
• Window Manufacturing
• Electronics Industry
• Heating and Cooling Industry
Packaging Industry
- Radiator Manufacturers
- Bridges, Pipelines and Power Supply Lines
Many Others.

10th European Algae Industry Summit
April 27-28, 2022 | Reykjavik, Iceland
Following the success of its 9 previous editions and to mark our 10th year anniversary, ACI is pleased to be hosting next edition of European Algae Industry Summit on the 27th & 28th April 2022 in Reykjavik, Iceland.
The conference will once again bring together key players within the algae industry including leaders from food, feed, nutraceuticals, pharmaceuticals and cosmetics across the globe to gain a deeper understanding of recent industry developments and economically viable applications and benefit from excellent live networking opportunities. This edition will focus on improving production methods, both from an efficiency and a sustainable perspective, with case studies from key players of each segment bringing forward their experience.
The conference will also take an in-depth look into the most recently developed technologies, the potential of algae as a biomaterials, as well as the way to get algae to the next level, on a standards, awareness and marketing levels. The various conference topics will be discussed through case studies sessions and interactive panel discussions, to ensure a positive exchange with all industry actors involved.

20th International Sunflower Conference
June 20-23, 2022 | Novi Sad, Serbia
On the behalf of the International Sunflower Association (ISA), we would like to invite you to the 20th International Sunflower Conference (ISC2020) to be held on 20-23 June, 2022 in Novi Sad, Serbia. This conference is organized by the Institute of Field and Vegetable Crops Novi Sad (IFVCNS), Serbia in collaboration with ISA. ISC2020 continues the long tradition of conferences on sunflower and provides the opportunity for sunflower people from all over the world to meet once again.
The conference sessions will be designed to attract common interests and create synergy among different disciplines in the sunflower research. They will include presentations and posters on cutting edge sunflower research and cover latest findings in plant breeding, crop protection, climatic stress, seed quality and many other topics. We encourage participants to exchange information and ideas in order to meet potential collaborators and maximize the conference networking potential.
We are looking forward to welcoming sunflower experts from all over the world for an exciting and diverse scientific program.
We invite everyone interested to submitting abstracts and papers.
Submission is open:
https://isc2020.com/call-for-papers/
Abstract Submission Deadline: 10 December 2021
Paper Submission Deadline: 20 March 2022
Registration is still open:
The conference website remains active and all conference information will continue to be published to the page: https://isc2020.com/program/program-overview/

Scientific Conference EFSA 2022
One - Health, Environmental, Society Conference 2022
21-24 giugno 2022 | Bruxelles e online

Food systems lie at the intersection of the many critical challenges facing us today: from fighting climate change, to halting biodiversity loss to reducing waste.

Meeting such challenges requires urgent action, as set out in the objectives for a sustainable future at the heart of the UN Development Goals and the European Commission’s Green Deal. EFSA is committed to supporting these objectives in cooperation with other EU agencies, Member States and international partners.

How will risk assessment science evolve over the next years to respond to these challenges? There is growing evidence that human, animal, and environmental health are inextricably linked, which means that risk assessment science cannot limit itself to food/feed safety. It needs to take a broader perspective, to pivot towards a “one health-one environment” approach.

That is why the scientific programme of the ONE – Health, Environment, Society – Conference 2022, taking place in Brussels and online from 21-24 June 2022, will be shaped in partnership with the European Centre for Disease Prevention and Control (ECDC), the European Chemicals Agency (ECHA), the European Environment Agency (EEA), the European Medicines Agency (EMA), and the European Commission’s Joint Research Centre.

EU Member States, EFSA’s international partners and scientists will also be invited to co-develop the scientific programme.

By bringing together scientists with diverse backgrounds and expertise, the conference will be an important opportunity to share knowledge and contribute to a crucial debate, addressing key topics on the EU political agenda.

In line with the guiding principles of sustainability, the conference will be held in a hybrid format which will allow remote participation, thus ensuring broad outreach while reducing travel emissions.

Key themes and objectives
• Examining food and feed safety from a broader perspective of sustainability.
• Exploring possible developments in risk assessment science.
• Reflecting on future strategic goals and directions for regulatory science.
• Contributing to new policy targets such as the EU Green Deal and its implementing strategies.

More details about the programme, registration and the call for abstracts will follow. Keep an eye on the conference website. Further information on the joint scientific programme can be found on our partners’ websites.

2nd World Congress on Oleo Science
WCOS 2022
August 27 - September 1, 2022 | Kushiro, Japan

In the summer of 2022, the Japan Oil Chemists’ Society, JOCS, will hold the 2nd World Congress on Oleo Science, WCOS 2022, in the eastern Hokkaido city of Kushiro to commemorate its 70th anniversary. Oleo science has played an important role in making life clean, healthy, and beautiful, and its future is bright with innovation.

WCOS 2022 will offer following three sessions:
• Science on Lipids, Oils, Fats, and their related industrial technologies
• Oleo Materials & Nano-Technologies
• Surfactant, Detergent, and Interface Science

The congress will also include the JOCS-AOCS Joint Meeting, ISF Plenary Lecture, and Kaufmann Memorial Lecture. Let’s share our cutting-edge research with each other.

We have established a fund to bring select speakers from overseas. In addition, excellent oral and poster presentations will be awarded the prize, and their papers will be published in our journal, Journal of Oleo Science. We are looking forward to welcoming you to Kushiro, the coolest city in Japan, in the summer of 2022.

16th International Rapeseed Congress
September 24 - 27, 2023 | Sydney, Australia

The GCIRC Executive board and General Assembly approved the proposition to organize the next 16th International Rapeseed Congress, in 2023, in Sydney.

CMS Australasia is the Organiser who will managing the 16th International Rapeseed Congress 2023.

Save the date!
