COMPOSTABILITY CERTIFICATIONS

The biodegradability and compostability of packaging through disposal in industrial composting plants are issues that companies face daily. Today, finding sustainable solutions with a lower impact for the environment is becoming more and more relevant, not only to comply with regulations, but also to improve positioning and image of products.

HOW TO ACQUIRE COMPOSTABILITY CERTIFICATIONS?

The Biodegradability Unit of **Innovhub SSI** provides customized comprehensive services consisting of consulting, testing and support for the acquisition of Compostability certifications, in compliance with international standard EN 13432.

Since 2018, Innovhub SSI has been a laboratory accredited by TUV-Austria to acquire the **OK Compost Industrial** and the **OK Compost HOME** logos.

BIODEGRADABILITY TESTING

- in compost - ISO 14855
- in soil - ISO 17556
- in aqueous medium - ISO 14852 for natural and synthetic polymers and plastics, containing additives and dyes; OECD 301B for chemicals
- in marine environment - ASTM 6691

COMPOSTABILITY TESTING

- disintegration test - ISO 16292, ISO 20200
- ecotoxicity test - OECD 208
- consulting to obtain the 'OK Compost' logo

Stazioni Sperimentali per l'Industria

Innovation for competitiveness

We are a national centre for applied research, analytical testing, innovation and technology transfer.

In our scientific laboratories we employ several experts to support paper, textile, fuels, oils, varnishes, detergents and cosmetics sectors, with the aim to promote research, innovation and industrial development, with particular attention to sustainability. We are involved in research projects in various areas, such as sustainability, food and energy. Besides, we offer testing and consultancy services for companies and public administrations, and are also active in technical standardization and in promotion of technical and scientific culture.

We are partner of the Enterprise Europe Network, a European Commission initiative active since 2008 to support innovation, technology transfer and internationalization of companies and research centres. The Network counts 700 partners, operating in more than 60 countries all over the world. Thanks to the participation in this project, we provide, free of charge, technical assistance services and commercial, technical partner search.
